Forecast for Saturday 13 Jul 2024

Weather: Mainly cloudy during the early hours, with this generally clear of the highest ground to allow some mist and fog patches to form in more prone valleys after earlier rain. On the cloudy side throughout Saturday, with initially mainly dry conditions giving way to the risk of slow-moving moderate or heavy downpours for a time. Some brighter interludes may develop late on as the showers ease, leading into a mainly fine evening with further shallow fog forming in valleys.

Chance of cloud-free hill tops above 800m: 70%

Low Cloud and visibility: Some valley mist and fog possible early and late. Otherwise broken cloud around 800 metres likely during the morning, probably narrowly clear in the afternoon, but with showers likely to bring significant deteriorations. Prevailing good visibility falling to poor in torrential downpours.

Meteorologist's View

Nothing to add.

Forecast for Sunday 14 Jul 2024

Weather: Probably the pick of the weekend days weather-wise, probably staying mainly dry with an outside chance of a fleeting light shower before eventual brighter weather develops and early low cloud disperses. There is a greater chance of sunny spells than of late, meaning walkers should be mindful of eventual higher UV and temperatures than in recent days.

Maximum wind: Strengthening southwesterly 25mph.

Chance of cloud-free hill tops above 800m: 80%

Low Cloud and visibility: Some early mist and fog in valleys, this gradually breaking and lifting to clear the highest ground by lunchtime, but later returning to lie around 800 metres. Visibility very good.

Temperature: **Valleys:** Plus 4 degrees Celsius becoming 20.
At 800m: Plus 9 Celsius.
Freezing level: Well above the summits.
